THE REPLY FILED 22 August 2008 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE.

1. ☒ The reply was filed after a final rejection, but prior to or on the same day as filing a Notice of Appeal. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. The reply must be filed within one of the following time periods:

- a) ☐ The period for reply expires \_\_\_\_\_ months from the mailing date of the final rejection.  
b) ☒ The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection.

Examiner Note: If box 1 is checked, check either box (a) or (b). ONLY CHECK BOX (b) WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).

Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Since a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37 CFR 41.37(a).

Supervisory Patent Examiner, Art Unit 2191

Applicant argued that references fail to disclose network-specific data comprising data for setting a network access level for the station or apparatus in claims 1, 9 and 17.

Examiner disagrees. In the previous office action, examiner responses that prior art Bunger implicitly discloses the network-specific data comprising data for setting a network access level for the station (col.5 lines 54-57 "the client-handheld conduit file 232 is used to setup a direct communication link between the installation server and the handheld computer." & col.5 lines 16-19 "The communications circuitry and the communications port preferably include one or more Network Interface Cards configured to communicate with the network". i.e. The conduit file implicitly included network-specific data for station communicating with network.). Bunger further discloses on col.8 lines 42-61 ("...At the same time, the installation server identifies the user type based on the user's authentication details from information contained in the user database 226 (FIG. 2). The identification of the user type provides details such as the type of user and handheld files to which the user has access to, or may be interested in, for example, the user's profession or area of specialty..."). Thus, Bunger discloses network configuration which describes network identification and access control. Same reason as disclosed in Cheshire. For the new claims 25-32 which is system claims, and are rejected the same reason set forth in connection of the rejection of claims 1-8.
